DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

2. Claims 26-100 are allowed.

3. The following is an examiner's statement of reasons for allowance:

The present invention provides a new image coding and decoding method capable of converting video frames to a representation in which a minimal amount of information may be used to exactly reconstruct the video frames, with any objective information redundancy being removed from the representation (specification, page 2, first paragraph).

Particularly, the new method comprises the following features, which the prior art taken either singly or in combination does not teach:

- wherein when an image has been coded to a lower resolution than an immediately preceding image, on adding the image to the reference image, artifacts at high resolution in the reference image are removed by setting the higher resolution data to zero so that the resolution of the reference image corresponds to the resolution of the coded image (see independent claims 26, 51, and 76).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
